## PROFESSIONAL SUMMARY

Flutter Developer with 3+ years of experience building high-performance cross-platform apps. Specialized in Firebase, Riverpod, GetX, application architecture, and REST API integration. Delivered 6+ production apps, improved performance through optimization, and deployed multiple apps to the Play Store.

## KEY SKILLS

Languages & Frameworks: Dart, Flutter, JavaScript (basic)

State Management: GetX, Riverpod

Backend / Services: Firebase (Auth, Firestore, Storage, FCM), REST APIs

Tools: Git, GitHub, Android Studio, VS Code, Figma

Other: UI/UX, SEO (on/off page), Play Store publishing, Video editing

Soft Skills: Problem-solving, Communication, Fast Learner, Team Collaboration

## WORK EXPERIENCE

### Flutter Developer (Freelance) – Remote

Sofol IT – (Jan 2023 – Present)

- Built scalable app architectures using Riverpod & GetX.
- Integrated Firebase Auth, Firestore, Storage & FCM for real-time applications.
- Reduced app loading time by up to 30% through image optimization and lazy loading.
- Developed full UI/UX for multi-screen applications and deployed to Play Store.
- Implemented payment systems (Bkash) securely.

## PROJECTS

### Campus Assistant - Campus Management App [ [website](#), [Play Store](#) ]

Tech: Flutter, Riverpod, Firebase (Auth, Firestore, Storage, Rules), FCM, PDF Export

- Built real-time campus system with academic data, file uploads, Notice & offline mode.
- Designed app architecture, Firestore schema & secure role-based access.
- Added PDF export and improved data loading by 25%.

### Wellbeing clinic - Mental Health App [ [Website](#), [Play Store](#) ]

Tech: Flutter, Firebase, Cloud Functions, FCM

- Implemented appointment booking, Psychological tests, and audio streaming.
- Designed full backend logic with schedules & notification .
- Successfully deployed to Play Store with a steady active user base.

### **Priyo Banskhali - Local Community App [ [Play Store](#) ]**

Tech: Flutter, Firebase Firestore, Storage, FCM

- Built a local news & emergency service platform with real-time updates.
- Integrated Notifications and Firestore for instant community alerts.
- Optimized queries for fast UI updates even on low-end devices.

### **Blood Finder - Blood Donor Community [ [Play Store](#) ]**

Tech: Flutter, Firebase (Auth, Firestore, Geo-queries), FCM

- Developed donor matching logic & geo-location search.
- Built emergency notification system used during urgent blood requests.
- Improved Firestore read efficiency by 30% with optimized queries.

### **Abrar Shop - E Commerce App [ [Play Store](#) ]**

Tech: Flutter, Firebase, Firestore, Bkash Payment

- Designed modern e-commerce platform with cart, checkout, orders & stock updates.
- Integrated secure payment system & real-time inventory dashboard.
- Implemented clean UI/UX improving user flow & conversion.

### **Task manager - Rest API [ [Github](#) ]**

- Tech: Flutter, Node.js, MongoDB, JWT Auth

- Built task app with login, CRUD operations, filters & activity logs.
- Integrated REST APIs with secure authentication flow.
- Designed clean UI for full task lifecycle.
